PRODUCT INNOVATION AND DIGITAL TRANSFORMATION

IDEATE **ENGINEER** **ADVANCE**
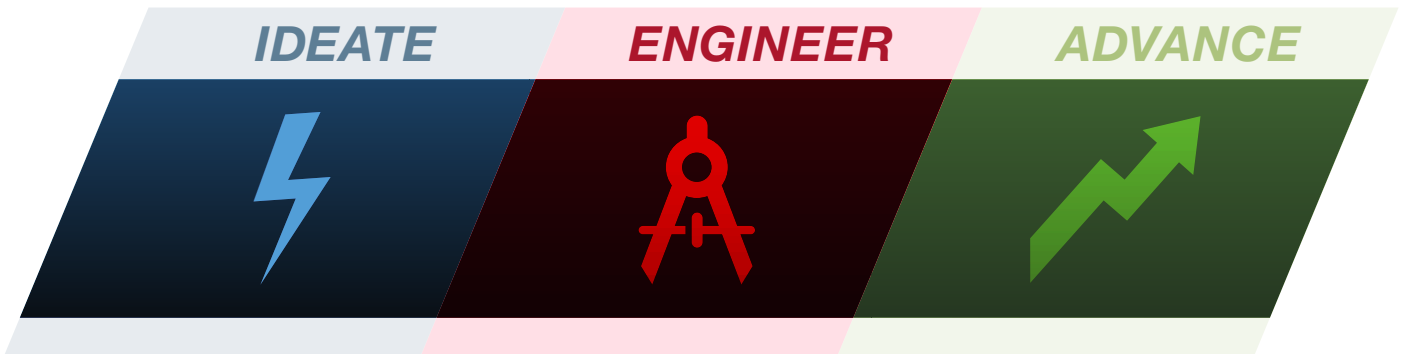

Boston Engineering provides product design and engineering consulting across the entire product development process. The company thrives on solving clients' toughest product innovation challenges and making a difference in the way that people work and live.

Founded in 1995, Boston Engineering combines focused creativity and experienced insight to deliver break-through products and technologies. Boston Engineering applies its ISO-certified process to ensure that projects succeed within tight deadlines, focused budgets, and meet stringent regulatory requirements.

Product Innovation Practices

Boston Engineering drives innovation from early product design, simulation, and commercialization through the management of smart, connected products.

Product Development - Design and engineer game-changing products

Digital Transformation - Leverage smart, connected tools and platforms
