

## Building and Maintaining Integrated Expertise

### What Is a Boston Engineering Center of Excellence?

*A Boston Engineering Center of Excellence is a promise to ourselves and our clients.*

#### We will:

- Provide leadership in technology, application, and implementation
- Improve our knowledge, expertise, and processes through continued learning
- Develop thought leaders who evaluate, understand, and solve the toughest challenges

### Why Does Boston Engineering utilize Centers of Excellence?

*Boston Engineering Centers of Excellence are the intersection of Subject Matter Experts, Technology, and Collaboration.*

#### Centers of Excellence provide:

- Unparalleled experience, leadership, and strategy
- Focused research, development, and technology innovation
- Unique knowledge, expertise, and processes
- Optimized, streamlined, and efficient client centered solutions

## Centers of Excellence Overview

### Digital Solutions

Developing and implementing technologies that integrate existing business and engineering systems for real-time management of your data

### Robotics

Combining our expertise in hardware, software, and digital platforms to create automated systems that improve the way people work and live

### Control Systems

Understanding and applying the modeling and simulation required to develop complex, algorithm derived controls that adapt to new challenges

### Embedded Systems

Designing, developing, and testing custom embedded hardware and software systems to support innovative product design

### Design for X

Utilizing disciplined product development practices and novel engineering to create differentiation and sustainable advantage

## What Most can only imagine, we engineer.

**Boston Engineering has transformed hundreds of bold and improbable ideas into indispensable products with the insights gained through our Centers of Excellence.**

**We guide clients** in high-impact industries —from commercial and industrial to defense and medical devices — through every phase of product development.

**No matter the challenge,** our team possesses the knowledge, expertise, and proven processes you need to bring your vision to life.

**Impossible Challenge? Try us.**
